PROFESSIONAL SUMMARY

Backend-first Full Stack Software Engineer with **3 years of experience** building high-scale production systems at Steelbazaar --- India's B2B steel marketplace. Specialize in **Java, Spring Boot, microservices, RBAC systems**, with a focus on query-level performance. Shipped modules serving **1,000+ business users** across buyer, seller, and admin roles. Hands-on with **JWT-based authentication, AWS S3 integration, and bulk data processing**. Currently targeting high-scale product engineering roles at Series A--C startups and unicorns.

SKILLS

Core Stack: Java, Spring Boot, Spring MVC, Spring Security, RESTful APIs, MySQL, Redis

Architecture: Microservices, RBAC, JWT Authentication, OOP, System Design, LLD / HLD

Cloud & Messaging: AWS S3, AWS SQS

Frontend: ReactJS, JavaScript, TypeScript

Tools: Git, GitHub, Bitbucket, Maven, JUnit, Postman, IntelliJ IDEA, DBeaver

EXPERIENCE

Software Development Engineer II

May 2023 -- Present

Steelbazaar (ABA Infotech) | B2B steel e-commerce platform Noida, India

- Designed and developed **35+ production REST APIs** using Java & Spring Boot, covering buyer/seller onboarding, business profiles, and admin operations --- serving **1,000+ B2B users** with sub-200ms p95 latency
- Architected **JWT-based auth + RBAC system** across 4 admin roles and multiple portal modules; enforced permission-level access with audit trails, reducing unauthorized access incidents to zero post-launch
- Integrated **AWS S3** for product image storage --- improved retrieval speed by **~45%** (from ~800ms to ~440ms via pre-signed URLs) and reduced storage overhead by **20%**
- Optimized **MySQL query performance** via composite indexing and service-layer refactoring, achieving a measured **30% reduction in API response time** under peak traffic (verified via DBeaver query plans)
- Built **bulk Excel (.xlsx) import/export** pipeline for product and inventory data --- eliminated manual data-entry for ops team, reducing processing time by **40%** across 10,000+ product records
- Automated OTP handling and GST verification by integrating **MSG91 & SIGNZY** APIs; reduced manual verification workload by **30%** and improved onboarding data accuracy significantly
- Diagnosed and resolved **50+ production issues**, maintaining **99.9% uptime** --- improved mean error recovery time by **40%**
- Outlined and reviewed **Low-Level Designs (LLDs)** for admin and customer modules, ensuring scalable, maintainable, and efficient system architecture across sprints
- Drove **architecture planning** and conducted code reviews across sprints, enforcing clean coding standards and reducing post-release bugs by **35%**
- Collaborated cross-functionally with product, QA, architects, and engineering teams to deliver customer-first, high-quality production outcomes

KEY MODULES BUILT AT STEELBAZAAR

URL Shortening Service

Java, Spring Boot, MySQL, Redis

- Built a production-ready URL shortening service with **SHA-256 hashing** and **Base36 encoding**, ensuring the same resource always maps to the same short code via **idempotent hash generation**
- Engineered **collision-safe salted retry logic** to handle hash conflicts gracefully, ensuring unique short code mapping under collision scenarios
- Defined **REST APIs** for resource creation and hash lookup with **DB indexing** on hash key columns for fast retrieval at scale. Layered **Redis** with **TTL-based expiry** and graceful degradation, reducing DB hits by 90% on repeated lookups

DigiMatch -- Buyer-Seller Matching Engine

Java, Spring Boot, React.js, MySQL

- Designed a scalable full-stack web application **matching buyers and sellers** connecting 1,000+ buyers and sellers with filters like **location, attributes, and product details**, **efficiently joining multiple tables**
- Optimized RESTful APIs for **search and filtering**, delivering match results in under 200ms
- Applied best practices in **API validation, debugging, and maintainability** for robust system performance

Product Catalogue & Inventory Management

Java, Spring Boot, React.js, MySQL

- Built a customer-facing full-stack platform managing 10k+ products, inventory, and pricing with modular services
- Integrated backend services and APIs for **bulk upload, validation, and automatic unpublishing** of products when inventory hits 0 or price expires, ensuring data consistency

EDUCATION

B.Sc in Computer Science

Maharaja Ganga Singh University

Full Stack Web Development Course

Masai School, Bengaluru

ACHIEVEMENTS

- Masai School Scholar** --- Selected for merit-based scholarship at Masai School, Bengaluru, awarded to top-performing candidates from the applicant pool (2022)
